

SIP Trunk

Upgrade your company's phone network connectivity. Choose voice-over-IP (VoIP) with SIP Trunk!

deep.eu

deep

SIP Trunk is a system for connecting telephone calls from your users between your PBX and the DEEP VoIP platform using Session Initiation Protocol.

DEEP's SIP Trunk solution offers the following main features:

- A dedicated connection that is completely isolated from the internet to guarantee network security
- Free communications within a company using the same SIP Trunk
- A flexible number of channels reserved for routing calls (the number of channels chosen defines the number of calls that may be made or received simultaneously)
- Keep your numbers with porting
- Technical support based in Luxembourg 

We offer 3 versions:

	SIP TRUNK ON CONNECTEDOFFICE	SIP TRUNK BUSINESS	SIP TRUNK CORPORATE
Redondance			
• Geo-redundant VoIP platform	✓	✓	✓
• Connectivity redundancy on one or more sites			✓

GOOD TO KNOW

Do you need to host other companies on your premises?

The BusinessCenter option allows you to allocate a number of dedicated channels to corporate tenants, which will be billed separately for their channels and communications.

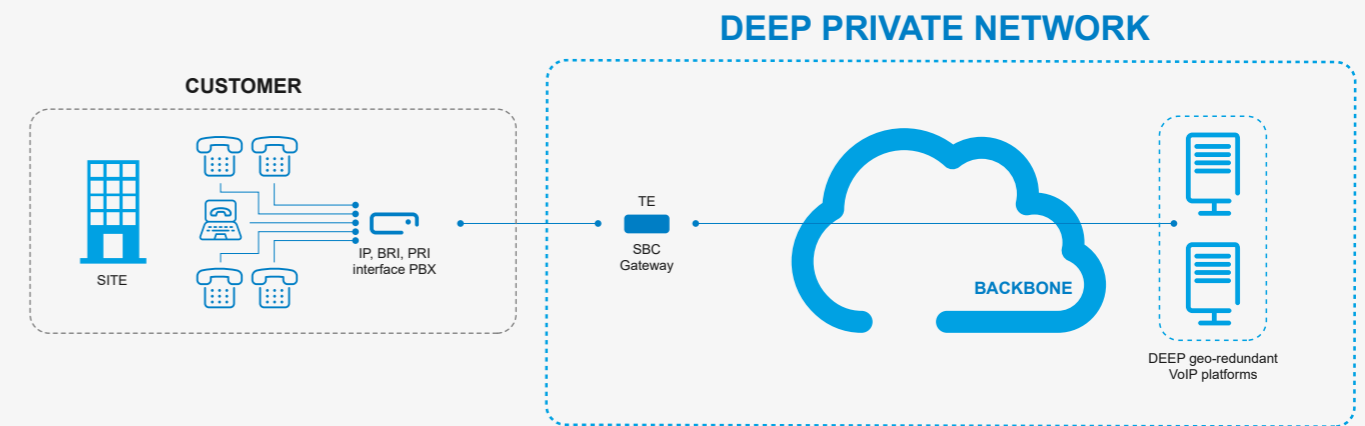

Compatible with SIP Trunk on ConnectedOffice and SIP Trunk Business.

Our DEEP experts can assist you with:

- ▶ creating a network that is tailored to the complexity of your infrastructure
- ▶ putting in place a VoIP migration or configuration plan

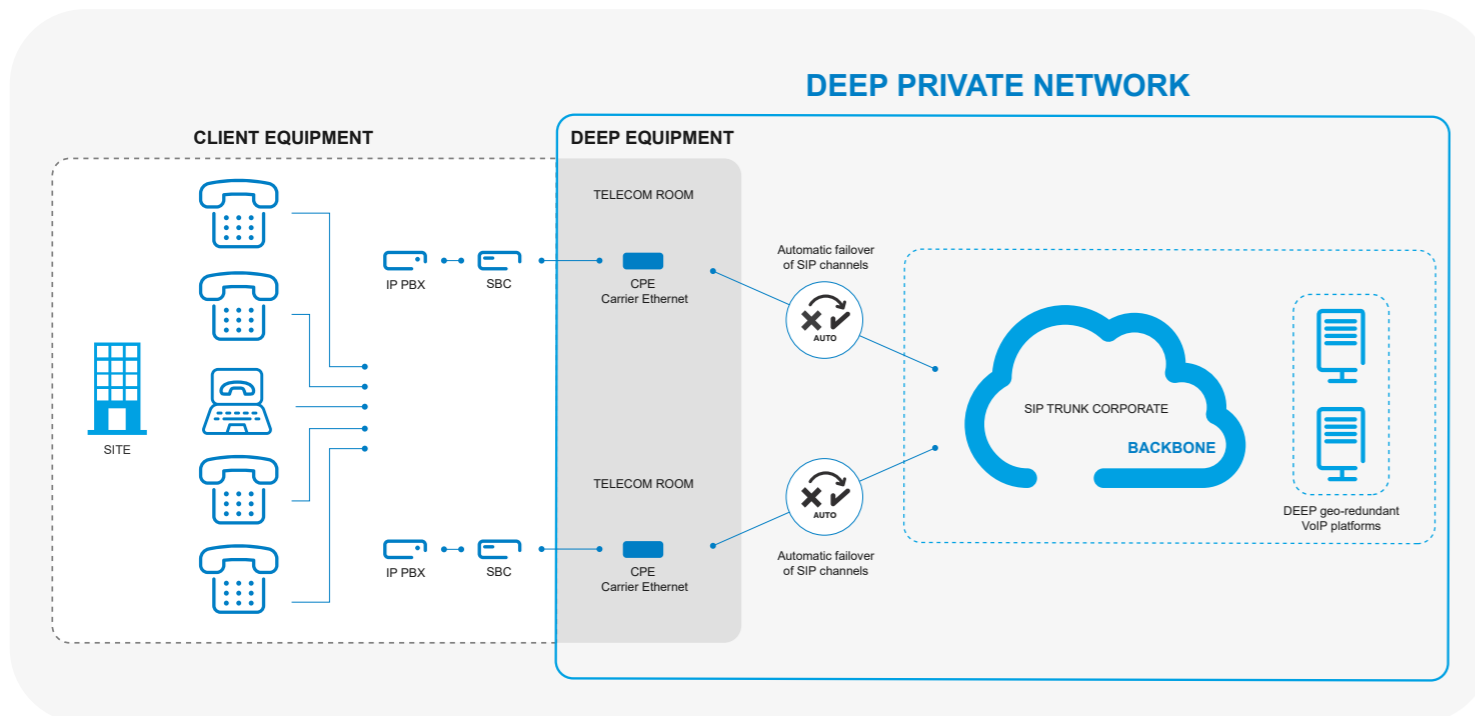

SIP TRUNK BUSINESS

SIP Trunk Business is intended for companies looking for an independent telephony solution and seeking to take control of their PBX.

SIP TRUNK CORPORATE

SIP Trunk Corporate is the premium solution for the Luxembourg market. It is intended for companies for which telephony is a critical activity. Redundancy guarantees service availability.

- In normal circumstances: phone calls are distributed evenly between the two lines.
- In the event of line failure: all phone calls are directed to the line that is still functioning; all capacity in terms of number of channels is handled by the connection that took over.

Do you need an all-in-one solution?

SIP Trunk on ConnectedOffice gives you a single physical connection for all the IT and telecom services you need: phone, internet, Wi-Fi, LAN, teleworking, etc.

With SIP Trunk on ConnectedOffice, you are choosing better manageability.

For more information about SIP Trunk on ConnectedOffice, please consult the ConnectedOffice product description.
